- Makeup section this Friday 12:30pm for Monday 2/29 section
- Final review March 11 (last section Monday March 7)
- If anything from the R cheatsheet looks unfamiliar to you, GO TO SECTION THIS WEEK!!!

What are we doing this week?

What are we doing this week?

- Previously

What are we doing this week?

- Previously
  - Learned about basic concepts of research

What are we doing this week?

- ▶ Previously
  - ▶ Learned about basic concepts of research
  - ▶ Learn ways to assess scientific research so you can understand, interpret, and criticize it

What are we doing this week?

- ► Previously
  - ► Learned about basic concepts of research
  - ► Learn ways to assess scientific research so you can understand, interpret, and criticize it
  - ► Learned basic features of the R programming language

- This week
  - Goal: apply and practice what you've learned (reinforce learning)
  - Today: use R to explore your data, put into practice concepts of descriptive statistics, making comparisons, correlations, linear regression
  - Friday: assess real-world examples of research

Cadence for Today

Cadence for Today

- Explore your data with your group and come up with at least 1 self-explanatory plot or table made using R (30-40min)

Cadence for Today

- ▶ Explore your data with your group and come up with at least 1 self-explanatory plot or table made using R (30-40min)
- ▶ Send your best (most interesting, informative) plot or best table to Dave

Cadence for Today

- Explore your data with your group and come up with at least 1 self-explanatory plot or table made using R (30-40min)
- Send your best (most interesting, informative) plot or best table to Dave
- Dave and Megan will (try to) present your results

Cadence for Today

- Explore your data with your group and come up with at least 1 self-explanatory plot or table made using R (30-40min)
- Send your best (most interesting, informative) plot or best table to Dave
- Dave and Megan will (try to) present your results
- You will get a R cheatsheet of functions we have covered thus far in class (what do you have questions about, what do you need to review, scope of functions for final)
